**PRODUCT LINE ENHANCEMENTS –
DIN-MOUNT SOLID STATE RELAYS FROM SE RELAYS**

Northfield, IL, April 15, 2009—SE Relays LLC announces the new Magnecraft brand SSRDIN Solid State Relay Series - a din-mount, RoHS compliant model now featuring a smaller footprint of 22 mm and an expanded switching range of 10 to 45 Amps.

The SSRDIN Series offers a complete solid state package that is an energy-efficient, current switching alternative to standard electromechanical relays. Advantages include longer life cycles, less energy consumption and reduced maintenance costs.

Three key features – an integral heat sink, an internal snubber, isolated input and output circuits – ensure product reliability. To simplify wiring, the enhanced SSRDIN Series also includes an integrated chassis ground.

Dipin Jain, SE Relays Marketing Product Manager, says; “The expanded current ratings and ability to switch DC loads is an exceptional evolution to this product family. A factory-tested, integrated heat sink simplifies the procurement and installation process. The SSRDIN Series is a true out-of-the-box solid state relay solution.”

The Magnecraft SSRDIN Series offers flexible mounting options. The relays can mount to panels as well as to din rails. Finger-safe terminals are a standard feature to protect operators from live currents and accidental shocks.

About SE Relays / Magnecraft

SE Relays is a Schneider Electric company selling the Magnecraft brand – a broad line of electro-mechanical, hybrid, solid state relays and sockets used in general purpose and industrial applications. As the industry leader in the electronic relay market, SE Relays provides innovative solutions through the continual launch of new products.

About Schneider Electric

As a global specialist in energy management with operations in more than 100 countries, Schneider Electric offers integrated solutions across multiple market segments, including leadership positions in energy and infrastructure, industrial processes, building automation, and data centers/networks, as well as a broad presence in residential applications. Focused on making energy safe, reliable, and efficient, the company's 114,000 employees achieved sales of more than 18.3 billion euros in 2008, through an active commitment to help individuals and organizations “Make the most of their energy™”.
