Schneider Electric Offers Solid State Relays for Reliable Process, Machine Control

Palatine, Ill. (USA), June 25, 2009 — The Schneider Electric Relay Competency Center (SE Relays LLC) expands the Zelio® relay product offer with Solid State Relays (SSRs) and accessories to meet equipment specifications for vibration resistance and increased reliability.

The offer comprises two industry standard formats – panel-mount (hockey-puck style) and DIN-mount with integrated heat sink. The Zelio SSRP panel-mount version optimizes size and performance with models able to switch up to 125 amperes. Corresponding accessories streamline the heat sinking process. The SSRD DIN-mount solid state relays provide ready-to-go solutions with an integral heat sink. Both models offer AC and DC control versions.

“I am very excited about this new offer as it fills a critical product gap. In addition, the offer meets the needs of distributors and customers, who rely on Schneider Electric to provide complete solutions.” says Dipin Jain, Product Manager.

Many industries such as packaging, food and beverage, plastic extrusion, industrial machines, HVAC, and textile manufacturing desire solid state switching solutions.

Schneider Electric Zelio Solid State Relays

Page 2 of 2

Schneider Electric employs strict quality controls during every aspect of the solid state relay production process. Automated robotics used in the PCB assembly adds consistency, and multi-stage product testing controls quality. Direct Copper Bonding (DCB) technology provides excellent electrical insulation and enhances thermal conductivity.

For more information on Zelio control products from Schneider Electric, call 1-888-778-2733 or visit the Relay Competency Center at www.serelays.com for product selection tools, downloadable 2D and 3D models, and specifications on the entire Zelio relay offer.

About SE Relays LLC

SE Relays LLC, a wholly owned subsidiary of Schneider Electric, designs, manufactures and supports a broad line of relays and sockets used in general purpose and industrial applications with the goal of continuous innovation and unparalleled customer service and support.

About Schneider Electric

As a global specialist in energy management with operations in more than 100 countries, Schneider Electric offers integrated solutions across multiple market segments, including leadership positions in energy and infrastructure, industrial processes, building automation, and data centers/networks, as well as a broad presence in residential applications. Focused on making energy safe, reliable, efficient, productive and green, the company's 114,000 employees achieved sales of more than \$23 billion in 2008.
